

TRACK. ANALYZE. OPTIMIZE.

CoughPro is a smartphone app used by 100k+ coughers that tracks cough unobtrusively in the background on both iOS and Android phones

TRANSFORM CHRONIC COUGH CARE

CoughPro provides data in the place of subjective guesswork and facilitates better communication between healthcare providers and their patients with unexplained and refractory chronic cough.

— “

The app allows me to be aware of my chronic cough. I have had it so long I often don't realize I am coughing and how much. It also allows me to see what time of day I cough to connect my activities that might trigger my cough.

” —

TRUSTED BY PROFESSIONALS

COUGHPRO IS GENERATING GREAT FEEDBACK FROM HEALTHCARE PROVIDERS, INCLUDING SPEECH-LANGUAGE PATHOLOGISTS

— “

My patients have often been on a long and winding healthcare journey to get help with their cough - and downloading and using the CoughPro app is one way they can be immediately empowered to gather their own cough data and discover insights that can optimize treatment outcomes.

” —

A wellness version of Behavioral Cough Suppression Therapy, the most effective evidence-driven treatment for UCC/RCC, will be launched within CoughPro in the coming weeks. Look for Cough Management in CoughPro!

Send an email to voucher@coughpro.com and we'll send you 5 vouchers to test CoughPro for free with your patients.
